

JUAN MANUEL RESTREPO

Junior Software Developer · Computer Science Teacher · Systems Engineering

Cali, Colombia | +57 315 265 3476 | juanpix2404@gmail.com | [linkedin.com/in/juan-manuel-restrepo-moreno](https://www.linkedin.com/in/juan-manuel-restrepo-moreno) | github.com/juanrex04 | juanrex04.github.io

PROFESSIONAL PROFILE

Systems Engineering with 4+ years of experience combining software development, quality assurance (QA), and agile methodologies (SCRUM). Proficient in VueJS, NodeJS, JavaScript, Python, Java SE, Firebase, SQL, and MongoDB. Complementary experience as a Computer Science teacher in bilingual International Baccalaureate (IB) programs, designing object-oriented programming, data structures, and algorithms projects. Self-taught, with strong logical thinking, technical documentation skills, and a problem-solving mindset.

TECHNICAL SKILLS

Languages & Technologies: VueJS, JavaScript, Python, Java SE, SQL, MongoDB, Firebase, Node.js, Express.js, Arduino

Methodologies: SCRUM, Agile Development, SDLC, STEM/STEAM

QA & Testing: Functional testing, bug reporting, software validation, technical documentation

Tools: GitHub, Google Workspace, APIs, Object-Oriented Programming (OOP), agile project management

Languages: Spanish (native), English (B2+)

PROFESSIONAL EXPERIENCE

Computer Science Teacher — Primary Years Programme (IB)

Jul 2025 – Present

Colegio Cañaverales International School

- Designed visual programming sequences (MakeCode and Arduino) and computational logic integrated into digital platforms.
- Managed technology tools and online learning within a bilingual environment.
- Created digital and interactive learning resources with a technical approach to content design.

Achievement: Developed integrative projects aligned with the POI, increasing student engagement with digital environments and fostering an open, internationally minded digital citizenship.

Computer Science Teacher — Diploma Programme (IB)

Aug 2021 – Jun 2025

Colegio Británico — The British School Cali

- Supervised IB Internal Assessments: design, coding, testing, and documentation of student projects.
- Applied SCRUM to school projects connected to industry standards.
- Taught OOP, data structures, databases, and algorithms in grades 9, 10, and 11, in a bilingual setting.
- Developed technical and curricular materials in English and Spanish for IB Computer Science.

Achievement: Improved the subject area plan by implementing programming-based integrative projects and developed personalized follow-up plans based on each student's needs and IB requirements.

QA Tester / Junior Developer

Mar 2020 – Feb 2021

BM Software

- Performed functional QA, bug reporting, and validation across the full software development cycle.
- Produced technical documentation: manuals, test logs, and reports.
- Developed minor features in JavaScript and Java SE under senior supervision.
- Collaborated with multidisciplinary teams under agile methodologies.

Achievement: Gained hands-on production experience, strong documentation skills, and SCRUM competencies that I now apply and teach.

EDUCATION

Universidad INCCA de Colombia — Systems Engineering	Sep 2025 – Present
Fundación Centro Colombiano de Estudios Profesionales — Information Systems Technology	Feb 2017 – Nov 2019
Diploma Course — Strategic Management and Innovation of Agile Projects	Dec 2019 – Jan 2020
