

Juan Manuel Restrepo

Junior Developer · Information Systems Technologist · Systems Engineering (in progress)

☎ 315 265 3476 ✉ juanpix2404@gmail.com 🌐 Spanish (Native) · English (B2+)

PROFESSIONAL PROFILE

Information Systems Technologist and Systems Engineer (in progress) with experience in software development, quality assurance (QA) testing, and agile methodologies (SCRUM). Proficient in JavaScript, Python, and Java SE, with over 4 years in high-demand technology environments applying logical thinking, technical documentation, and problem-solving skills. Self-taught, committed to continuous improvement, and fluent in English (B2+) for work in international technical teams.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java SE

Methodologies: SCRUM, agile development, Software Development Life Cycle (SDLC)

QA & Testing: Functional testing, bug reporting, technical documentation, software validation

Tools: GitHub, Google Workspace, agile project management

Other: Project documentation, APIs, computational logic, object-oriented programming (OOP)

WORK EXPERIENCE

BM Software | Tester / Junior Developer

March 2020 – February 2021

Responsibilities

- Executed software quality assurance (QA) tests following technical standards, identifying functional errors and generating detailed reports for the development team.
- Participated in the full software development cycle, covering testing, bug fixing, and functionality validation phases.
- Produced technical documentation for software projects, including manuals, bug reports, and test logs.
- Developed minor features in JavaScript and Java SE under the supervision of senior technical staff.
- Collaborated within multidisciplinary agile teams to meet delivery deadlines consistently.

Achievements

- Actively contributed to the quality control cycle of commercial software projects, gaining hands-on experience in production environments.
- Built strong technical documentation skills later applied in both academic and professional projects.
- Strengthened collaborative work within agile (SCRUM) teams — a competency I continue to apply and teach in technology contexts.

Colegio Británico — The British School Cali | Computer Science Teacher · IB Diploma Programme

August 2021 – June 2025

Technical Relevance

- Designed and supervised individual student programming projects (IB Internal Assessment), guiding design, coding, testing, and software documentation processes.
- Implemented agile methodologies (SCRUM) in programming projects, bridging school practice with real industry standards.
- Taught object-oriented programming, data structures, and algorithms in a bilingual environment to students in grades 10–12.

- Developed technical and curricular materials in both English and Spanish for the IB Diploma Programme Computer Science component.

Colegio Cañaverales International School | Computer Science Teacher · IB Primary Years Programme

July 2025 – Present

Technical Relevance

- Designed visual programming sequences (Scratch, computational logic) and integrated them into digital learning platforms.
- Managed technology tools and online learning management systems in a bilingual environment.
- Developed interactive digital teaching resources by applying technical knowledge in content design.

EDUCATION

Universidad INCCA de Colombia

Systems Engineering *September 2025 – Present*

Fundación Centro Colombiano de Estudios Profesionales

Information Systems Technology *February 2017 – November 2019*

Diploma in Agile Project Management and Strategic Innovation *December 2019 – January 2020*

RELEVANT CERTIFICATIONS
